CAMERA BATTERY CHARGER

ADAPTERS FOR BLADE STYLE BATTERIES

USER GUIDE

PLEASE READ CAREFULLY BEFORE USE

1

Identify the positive and negative terminals (A & B) on the underside of the battery - as shown left, they are clearly marked as the two outside 'slots' of the four terminals.

2

Position the CamCaddy Tags so that the Terminal Contacts (C & D) are uppermost (as shown), then insert them fully into the positive and negative slots (A and B) on the battery.

3

Turn the assembly upside down so that the battery terminals are on the bottom, pull back the Slider Bar (E) on Camcaddy, and lower into place so that the Tags make contact with CamCaddy's Power Pins (F & G), **taking care to ensure that each Power Pin touches only one Tag**. Release the Slider Bar to hold the battery in place for charging.

NOTE: For further details on using CamCaddy, please refer to the User Manual supplied with CamCaddy.
