

SolarMate®

# A SUPERIOR RANGE OF GARDEN LIGHTS

**EVEN BRIGHTER FOR 2009**

**A true revolution in solar garden light performance! The SolarMate range provides four main benefits:**

- **Brightness**
- **Long run times**
- **Beauty in design**
- **Long term warranty**

**This unique range features ground breaking technology to deliver performance only previously possible with mains connected garden lighting.**

### Brightness

By using larger bulbs, bigger bulb clusters and the award winning Nichia Super LED, all SolarMate lights generate incredible levels of brightness whilst still consuming miniscule amounts of energy.

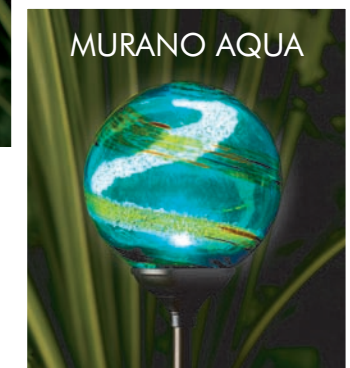

### Long Run Times

Some of the range now incorporates SmartTime™ technologies. This is an ingenious auto timer that switches the light on at dusk and off after 6 hours operation, so ensuring consistent performance night after night.

### Design

All SolarMate lights have been designed to complement a wide style of gardens, whether contemporary or traditional. Each light is made from marine grade stainless steel (or coated aluminium for the Murano) and all have a glass lens for optical clarity

and beauty. The Murano glass globes are additionally hand blown and individually decorated.

FULL DETAILS OVERLEAF

## VENETIAN (2 light pack) Part Number SM41303

**Venetian** is an ideal light for many areas of the garden. Constructed from the best materials, Venetian delivers a beautiful glow if more subdued lighting is required. It uses a single NIMH, AA rechargeable battery (supplied) which gives long term performance of approximately 2 years and can be easily replaced. The right choice for accent lighting.

**Dimensions:**  
Diameter 13.1cm; Height 10.3cm  
Post/ground spike 29.4cm  
Overall height 39.7cm

## TORINO Part Number SM42303

**Torino** delivers the ultimate in illumination and its brightness can truly be compared with many mains low voltage garden lights. Benefiting from performance enhancing SmartTime™ technologies, a high power Lithium-ion battery and an incredible 6 bulb light cluster, Torino is a must for areas where a greater spread of light is necessary. Torino's lightpool is 2.5m (8') in diameter and is perfect for paths, driveways and patio edges by ponds. Looks wonderful if used to create light on a favoured specimen shrub.

**Dimensions:**  
Diameter 17.2cm; Height 12.5cm  
Post/ground spike 37cm; Overall height 49.5cm

## MURANO GLOBES – AQUA , MIDNIGHT & SUNSET

**Murano** blends modern technology with centuries old skill of hand blowing glass. Each unique glass globe contains embedded luminescent crystals which, once dark, give a wonderful glow but when you add in a super bright LED bulb powered by our state of the art solar cell, the effect is truly wondrous. Once dark both **Aqua** and **Midnight** globes appear to magically float in the air – truly inspiring!

Part Numbers SM41333 (Aqua)  
SM41330 (Midnight) SM41336 (Sunset)

**Dimensions:** diameter 10cm; height 36cm;  
post/ground spike 38cm; overall height 84cm

The **Sunset** is a great twist on the already popular Murano theme. Still made from heavy duty glass the Sunset globe has a "crazed" appearance and at night its multi-coloured bulb glides through an incredible light show. **The entire globe changes from green to blue to red** making it the perfect centrepiece for a prized spot in any garden.

## ROMA Part Number SM43303

The **Roma** takes brightness to the next level with a **20 times bulb brightness over a standard solar light**. Capable of illuminating an area up to 7m (23 feet) in diameter and using SmartTime™ technologies, a "Nichia" bulb and eco friendly Lithium ion batteries, Roma is the only choice where nothing but the best will do! Supplied with stainless steel ground fixings and four pegs for staking into soil or grass. An excellent choice for patios, decks, driveways, paths, municipal walkways, car parks etc.

**Dimensions:**  
Diameter 18.7cm; Height 13.7cm; Post 46.3cm; Overall height 60cm

### WORKS IN ALL DAYLIGHT CONDITIONS

### Guarantee

All SolarMate lights have a 2 year warranty (excluding the battery\*) giving long term peace of mind that the investment made will be backed up by first class support.

\*Batteries should last for approx 2 years and can be replaced at your retailer or through [www.solartechology.co.uk](http://www.solartechology.co.uk)
